Chief, [REDACTED]

25X1A2d1

Approval of Operation of Club and mess  
Facilities [REDACTED]

25X1A6a

## Information

25X1A6c

- (a) [REDACTED] dated 7 July 1960  
 (b) [REDACTED] dated 18 October 1960  
 (c) [REDACTED] dated 25 November 1960  
 (d) [REDACTED] dated 29 February 1960

1. With respect to the request contained in paragraph 2 of reference (a), it was not the intent of Headquarters to require each station already operating a mess and club to request an approval for such operation merely as a result of revised policies developed and sent to the field in 1960. Therefore, in view of the fact that both the [REDACTED] 25X1A6a bases were operating messes and clubs prior to 1960, and there is no service need for their continuation, this dispatch will constitute approval to continue operation of those facilities. The continued operations, records and reports shall be in accordance with the tentative policy on messes and clubs as set forth in reference (a) and as restated to the 77 stations in reference (c). See also reference (d) for minor modifications.

2. The copies of cost studies attached to reference (a) have been reviewed at Headquarters and, although from Headquarters it is not feasible to fully evaluate this problem, they appear generally to represent adequate and reasonable statements of costs of mess and club facilities at these two locations. In this connection, we would question the propriety of including on the statement for the [REDACTED] Club and Mess Expenses, item 11, the entire cost of transportation to and from the field for the Mess Officer and his wife, since it is assumed that this cost would actually apply to the entire tour of this employee rather than to the single year covered by the statement.
